6054/6055/7007 Deep-Well Baths

Wichtigste Merkmale

- Extratiefe Bäder, geeignet für Thermometriearbeiten, für die zusätzliche Tanktiefe und überragende Stabilität erforderlich sind.
- Konstanter Flüssigkeitspegel durch konzentrische Rohrkonstruktion.
- Spezielles Design für die Sichtung von Flüssigkeits-Glas-Thermometern (LIG).
- Die Tiefe der Bäder reicht von 43 bis 60 cm, um Wärmeleiteffekte an Messfühlern auszuschließen, die tiefes Eintauchen erfordern.

Produktübersicht: 6054/6055/7007 Deep-Well Baths

The 7007 is designed for the temperature range of -5 °C to 110 °C , has built-in refrigeration, is 24 inches deep, and comes with a removable polycarbonate cover.

The 6054 covers the temperature range of 50 °C to 300 °C , is also 24 inches deep, and comes with a removable stainless steel cover.

The 6055 is engineered for the temperature range of 200 °C to 550 °C with salt and is 17 inches deep. Specific size differences and various specifications are shown in the comparison table.

The Model 6055, operating up to 550 °C , uses molten salts with a pumping system for maintaining the necessary consistent fluid level required for liquid-in-glass thermometer calibrations. A viewing channel is built into the top cover

for a clear visual path to your glass thermometers.

The 6055 also has an optional thermometer carousel for holding several glass thermometers in the correct calibration position without exposing them to the hot salts in the bath. The Model 2018 Carousel is completely constructed of stainless steel and has an elevated handle for rotating your thermometers to the viewing position.

These deep-well baths are built to the same performance standards as all Fluke Calibration baths, which means you can't find another bath that has better stability or uniformity.
