

TECHNICAL DATA

CPS-2270-20M-P3K Contamination Prevention System

Product overview: CPS-2270-20M-P3K Contamination Prevention System

The CPS-2270-20M-P3K P3000 Contamination Prevention System (CPS) is an optional accessory that safeguards the 2271A Industrial Pressure Calibrator against contamination. It includes a P3000 Test Port and adapters that enable you to connect the CPS to various devices under test (DUTs).

The P3000 Test port uses a reverse-thread test port with hand-tight connections that limits the number of potential leak paths when connecting to a DUT. It includes lines and fittings required to connect to the 2271A Automated Pressure Calibrator. This accessory makes use of the adapters provided with the 2271A Calibrator.
