2019-DCB Fluid Level Adapter | Fluid Level Adapter

Product overview: 2019-DCB Fluid Level Adapter | Fluid Level Adapter

The 2019 fluid level adapter slides directly into the test wells of the Fluke Calibration 7030, 7013, and 7100 calibration baths, for glass thermometer calibration applications.

The fluid level adapter creates a positive bath fluid surface. The bath fluid in the test well is pumped up to the surface of the bath and kept there. This puts the glass thermometer meniscus above the edge of the bath test well for clear viewing during calibration. The clear acrylic adapter cover protects the bath fluid from ambient temperature effects for better bath stability. The cover can be drilled for any size probe. The adapter is easily pulled from the bath test well to allow more room during calibration of other thermometers and sensors.
