FVF-SC4 | FlukeView Forms with Cable for 8845/8846

Product overview: FVF-SC4 | FlukeView Forms with Cable for 8845/8846

Expand the power of the world's most rugged, accurate handheld test tools with FlukeView® Forms Documenting Software.

To address the increasing demands for reporting and documentation, Fluke presents FlukeView Forms documenting software. FlukeView Forms increases the power of your Fluke tool by enabling you to document, store and analyze individual readings or series of measurements, then convert them into professional-looking documents.

FlukeView® Forms Basic (FVF-BASIC)
Owners of Fluke 280 series, 180 series, 789 and 1550B, who do not need the full power of FlukeView forms, can use FlukeView® Basic version. Transfer data points from your meter to your PC and use the two standard, non-customizable forms to display your readings in table or graphical form. For a larger array of forms or to use FlukeView® Forms Designer to customize your forms, upgrade to FlukeView® Forms version 3.3 with FVF-UG.

FlukeView Forms Compatibility Chart
