

TECHNICAL DATA

2384-T | Smart Connector, TC (Blue Cap), Spare

Product overview: 2384-T | Smart Connector, TC (Blue Cap), Spare

The 2384-T is a spare smart (INFO-CON) connector for use with the 1523 or 1524 Reference Thermometers and is recommended for noble metal thermocouples such as Type S and Type R. The thermocouple connector supports reference junction compensation (RJC) with its own internal precision thermistor. Calibration coefficients for the thermocouple may be programmed directly into the dedicated connector using the 1523 or 1524, an RS-232 connection to a computer, and free software that comes with the 1523/24. When connected to the 1523 or 1524 the displayed temperature will be calculated from the unique thermocouple calibration coefficients.
