

TECHNICAL DATA

Probe Support Hardware

Key features

- Mechanical support systems for probe suspension.
- Single probe kit includes a medium clamp, 10-inch rod, bosshead, and screw down base.
- Economy kit includes V-bases, stainless steel rod, rods, bossheads, micro-clamps, and medium clamp.
- Individual hardware includes a selection of clamps, stands, rods, bossheads, and bases.

Product overview: Probe Support Hardware

Mechanical support for probes

When setting up a new calibration bath, you need a way to suspend your probes in the bath fluid. We recommend our modular mechanical support systems. Made of fine-quality steel and machined parts, these support components combine in many ways to solve almost any probe suspension problem.

Single probe kit

Our single probe kit is a good way to get started. It has one probe holder¹ (clamp), one 10-inch rod, one bosshead, and one base for holding one probe.

Economy kit

Our economy kit includes two bases², four stainless steel rods (1 each of 29, 23, 20, and 10 inch), and three bossheads. This set will build a bench-mounted frame for suspending one rod and two probe holder arms over a bath opening. Simply add to your setup as needed. Choose from any of the listed accessories.

Individual hardware

The hardware included in these probe holding kits canOur selection of clamps and stands provides a simple way to hold probes and thermometers in baths during calibration. System components can be assembled in a number of ways to suit individual needs. Select clamps, rods, bossheads, and bases to fit your individual needs.

¹Fluke has recently designed a new probe holder which makes positioning a temperature probe quicker, easier, and more secure. It is an excellent choice for probes of up to 10 mm (0.39 inch) diameter.

²The V-Base has been replaced by a smaller base which can be mounted to a work bench or directly on a bath or furnace top surface.

Ordering information

2050

Economy Clamp Kit

Includes:

- 2 Bases
- 1 29-inch stainless steel rod
- 1 23-inch stainless steel rod
- 1 20-inch stainless steel rod
- 1 20-inch stainless steel rod
- 3 Bossheads
- 2 Probe holding arms

2060

Stainless Steel Rods (package of 1)

23 inches

Used to assemble supports, frameworks, or scaffolds
