

2566 | Thermocouple Scanner Module, 12-channel

Productoverzicht: 2566 | Thermocouple Scanner Module, 12-channel

This module has 12 channels and reads K, J, T, S, R, B, E, and N thermocouples. (Support for C and U type thermocouples is available. Download the application note [Using Fluke Calibration Readouts with Tungsten-Rhenium and other Thermocouples »](#)) Each channel can be set to read a different type of thermocouple. All temperature readings are performed in exactly the same manner as with the 2565 module.

The connectors on the scanner module are special dual connectors that accept both the common miniature and standard thermocouple connectors. If you want to use screw terminals, use the appropriately- sized connector with the hood removed.
