MET/CAL EMAIL

Ürün İncelemesi: MET/CAL EMAIL

Email recipients can be individuals, groups, or both. There is no limit to the number of groups that can be set up, and individuals can be members of multiple groups.

Email schedules are easy to set up. Scheduling methods similar to those used for Microsoft users or users of typical UNIX systems are used.

Reports are quick and easy to create. Users have complete freedom to choose the report format. For example, the system administrator could create reports that generate automated survey forms. The reports are initially created in HTML format and are in an attractive table style, but they can be modified by the administrator.

MET/CAL EMAIL is installed on the MET/TRACK server; there is no client installation. The server does not need to be restarted after installation, so the production server is not interrupted. No ODBC or web servers are required for installation. System administration is carried out via a modern web browser that supports JavaScript, CSS 1.0 and DOM 1.0 (Mozilla 1.6+, Mozilla Firefox 1.0+, Netscape 7.1+, Internet Explorer 6+).

Özellikler: MET/CAL EMAIL

MET/CAL Plus version 7 or higher required.
